10 milestones in Information Systems

Per Flensburg

A historic overview of the development of the discipline of Information Systems

It can be found here: [10 milestones in Information Systems](http://www.perflensburg.se/Milestones/)

(<http://www.perflensburg.se/Milestones/>)

The first app in the world was Stonehenge, created about 4 500 years ago. In this lecture I explain why and starting 1890 I identify 10 milestones in the development of information systems and the year they can be defined:

1. Encoding of information 1890
2. Numerical calculations 1940
3. System Development 1965
4. Users 1975
5. Databases 1980
6. Design 1985
7. Object Orientation 1990
8. Internet, 1995
9. Internet, social media 2005
10. The Cloud 2015

Flensburg is professor of Information Systems at Strömstad Academy since Jan 28th 2018. Before that he was professor of informatics at Växjö University and University West. He started his academic career 1972 and have been interested in many things, from assembler programming to Heidegger's existential philosophy. Since 2013 he has been studying philosophy and philosophy of science. This lecture, or rather series of small lectures, is a result of the latter interest. Enjoy!

Strömstad akademis styrelse beslutade 12 oktober 2019 att inrätta Strömstad akademis videoserie med följande riktlinjer: Ledamöter i Strömstad akademi kan få en video publicerad i Strömstad akademis videoserie. Det är akademins redaktionskommitté som avgör om en video kan publiceras av akademien. Författaren ansvarar för innehållet och för att det inte strider mot svensk lag eller innehåller copyrightskyddat material.
